

Maintenance Checklist

Set these things up straight away

- Backups
- Cache
- Uptime monitor
- Google search console
- Google Analytics

Things to do every week

- Run updates for core, themes and plugins
- Delete spam comments
- Run malware scans if you're doing these manually

Things to do monthly

- Check your sites speed
- Delete anything you don't need

Things to do occasionally

- Update your content
- Refresh your images
- Look at your analytics, make changes accordingly
